

1. I mainly use edits and canva and sometimes capcut and inshot. Edits and canva are super convenient and I get enough features so I'm good with that.
2. Surely I would.
3. I am good with making short videos and adding a little effects.
4. In the video attached, I've used multiple videos but only for a very short time by trimming them and I've added texts too.
5. I think I can do it. Like I did this time ;)
6. I can take videos, but my hands are not very stable but end of the day I do end up getting cool videos so I guess I'll incorporate that.
